Material Compliance Reporting with the CDX System

The Compliance Data Exchange (CDX) system provided by DXC Technology facilitates a compliant and holistic material reporting process as well as the collection, maintenance and analysis of material data along your entire supply chain.

With the dedicated service module “**CDX – Starter Guidance**”, **compliance professional** supports you in setting up your Material Reporting with an emphasis on the CDX environment.

With our CDX services including Consulting, Implementation, Information, and Support of your company’s responsible units, our experts cater to your specific needs and requirements.

Service Module “**CDX – Starter Guidance**”

compliance professional advises you on a strategy, development stages and solution scenarios tailored to your corporate requirements and needs when implementing the CDX system. The consulting is conducted as web meetings with our experts.

This service module comprises eight consulting hours including six hours reserved for two web meetings.

Meeting 1 Professional Requirements

Objective: you understand your company’s Material Compliance requirements. You know the range of functions of the CDX system and can plan its efficient use. You can estimate the resources required for implementing CDX in your company and in your supply chain. You are able to make decisions when it comes to using CDX in a way adapted to your work process and those involved in your company.

- What goals do you want to achieve with deployment of CDX?
 - National and international legal regulations
 - Countries, markets
 - Exceptions and current developments in Material and Product Compliance: REACH, RoHS, China RoHS, Conflict Minerals, WEEE, Batteries and Packaging Ordinance, Proposition 65, HKC, etc.
- What are your actions when implementing CDX?
- Creating a Material Compliance environment: parties concerned, specifications for suppliers and purchase agreements, etc.
- Assigning roles and responsibilities
- Defining the processes for long-term use of CDX
 - Supplier Management, Data Validation, Reporting, etc.
- Implementation and communication strategy

Meeting 2 Technical Implementation

Objective: you understand the functionality and implications of CDX for Material Reporting in your company and at all levels of the supply chain. You can plan a compliant Material Management with CDX in detail.

- Customizing CDX:
 - Company data, Organizational Units
 - Assigning Key Users, Users, Contact Persons, Rights Management, etc.
- Example of Supplier Invitation for Registration
- Options of Personalized Supplier Message
- Getting to know Static Reminder Intervals
- Information logistics in the supply chain
- Data management based on routine functions of CDX and protection of your intellectual property
- Analysis and Reporting options in relation to material conformities
- Scope of services and training needs assessment
- Customized consulting by **compliance professional** on further course of action

Legal Notice

For the provision of all services described, a valid CDX MDS license is a necessary prerequisite. Our service is linked to the respective license package (https://public.cdssystem.com/en/web/cdx/ordering_mds). Any transfer of the service to another license is excluded.

The registration of your suppliers depends to a large extent on their motivation or, if applicable, their contractual compliance to cooperate. Individual measures may be necessary, which **compliance professional** offers as a separate service.

Our experts are glad to assist you in Planning, Implementation, Optimization and Support of further Compliance tasks with CDX. We are happy to provide a customized quote for services in the following areas:

- **Consulting**
 - Individual consulting on Compliance solutions and implementing CDX in your company
 - Support in setting up all CDX activities and functions within your company
 - Assistance in solving your current Material Reporting problems
- **Onboarding**
 - Suppliers identification and registration
 - Suppliers support
- **Service**
 - Suppliers Management
 - Data Collection, Validation, Update and Migration
 - Reporting
- **Training (classroom and Web-seminars worldwide)**
 - Training of your personnel
 - Training of your suppliers
