CDX, SCIP & SSN

Hands-On Guide

“new DXC”

Introduction

- Under the Waste Framework Directive each Legal Entity (LE) that places a product on the market is required to provide information to the ECHA about the chemical composition of the sold product
- The most common way – and the way that most member states have made a legal requirement – is to provide a SCIP Dossier by using the SCIP Submission portal
- Unfortunately, companies selling their products under different LEs – are required to provide a Dossier per LE
- In order to mitigate the additional effort, ECHA allows for what is called Simplified SCIP Notification (SSN)
- The SSN is a claim that an existing full dossier represents a product sold by the LE
- Technically, the Dossier will just replace the LE information in the full dossier and refer to the original data
- EACH SSN must only be submitted once and will automatically reflect all further updates to the original Dossier

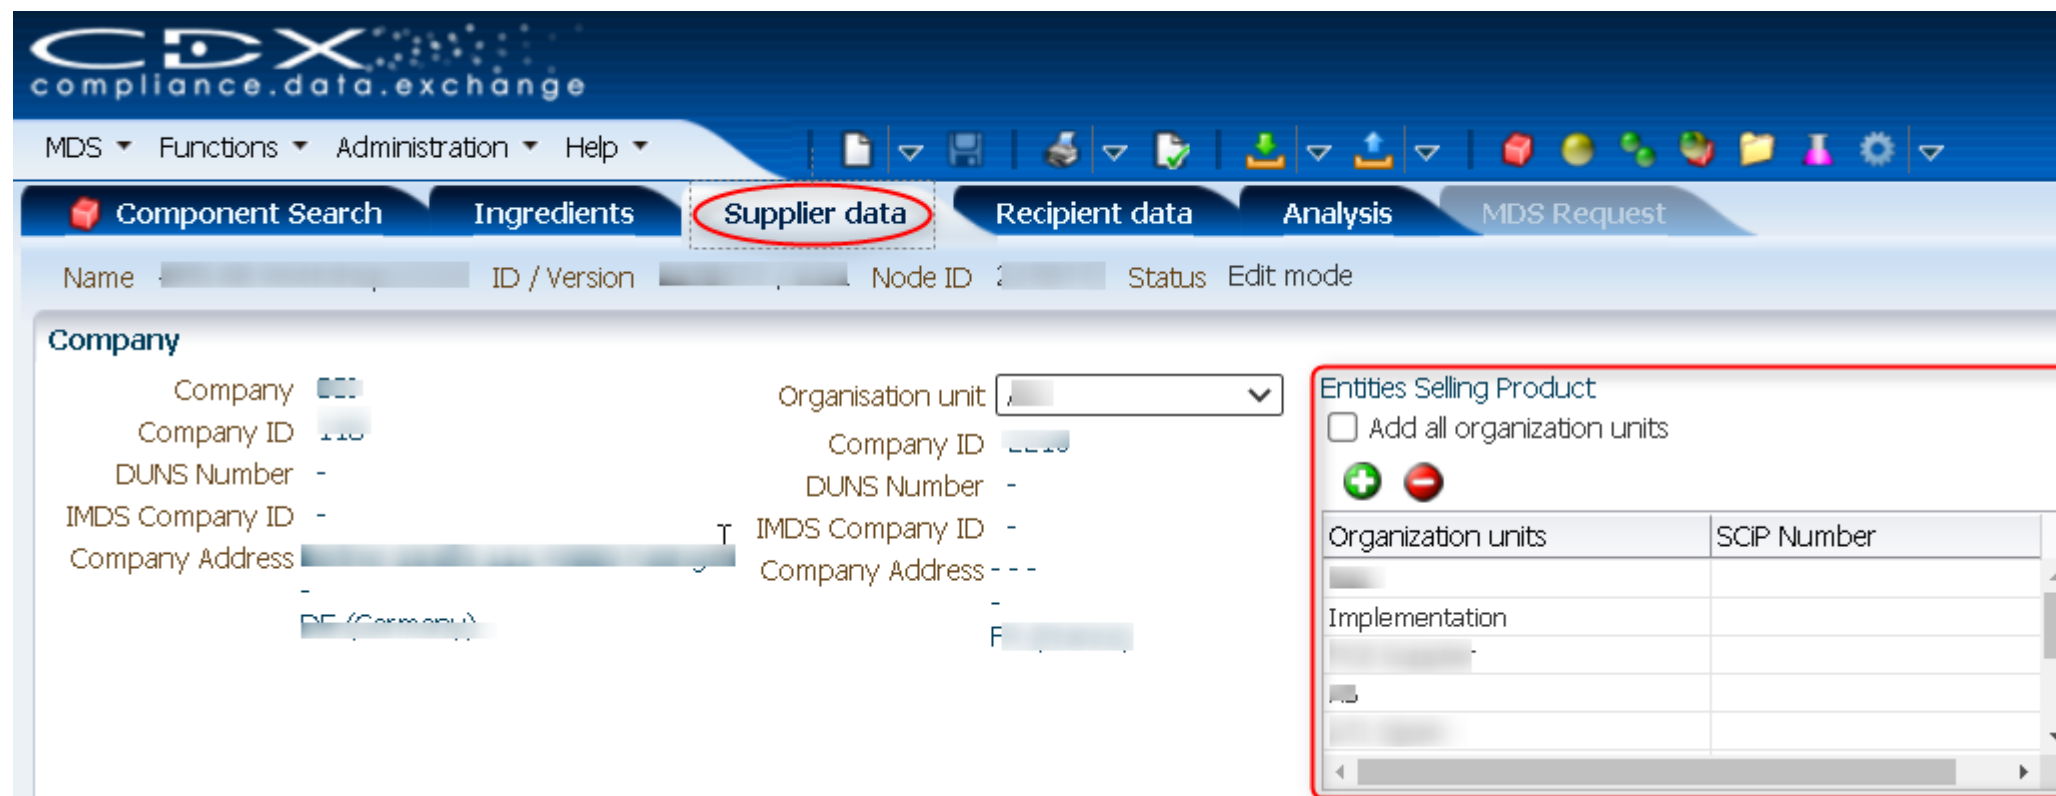

Step #1 – Prepare any Org Unit in CDX that shall be understood as Legal Entity (LE)

The screenshot shows the CDX web application interface. The top navigation bar includes 'MDS', 'Functions', 'Administration', and 'Help'. The left sidebar shows a tree view of organizational units, with 'AB (2210)' selected. The main content area displays the 'Org Unit' details for 'AB (2210)'. The details include fields for Name (AB), Company ID (2210), DUNS Number, Bosch Supplier No., and Supplyon SPIN ID. There are also fields for Zip Code, City, State / Province, and Street. Below the details is a section for 'Upload S2S Key' with an 'Import' button and a table showing the company name 'DXC.Technology - EntServ Deutschland GmbH' and the last uploaded time '01/21/2021 16:38:13'.

- For each Selling Legal Entity (SLE) that shall be enabled for receiving SSN, a S2S Key must be defined (see the hands on guide on configuring SCIP in CDX)
- Make sure every LE has a unique key, else ECHA will be reporting back errors...

Step #2 – Prepare your MDSEs to make use of the SLE

Go to supplier data

Select those Org Units that shall be SLE

Then simply export as SCIP Dossier as you know it by MDS -> Export -> SCIP Submission

Step # 3 – Monitor the Queue and Collection Manager (QCM)

The screenshot shows the CDX Compliance Data Exchange (CDX) interface. The main window displays the Queue and Collection Manager (QCM) section. The left sidebar shows a tree view with folders for 'SSN (7)', 'Queue Management (6)', and 'SCIP Submissions (6)'. The main area shows a 'Detail' view of a table with columns: Type, Notification Type, Company ID, Company Name, Name, Creation Status, Submission Status, and Submission Number. The table contains four rows of data. The first two rows have 'SSN' in the Notification Type column, and the last two rows have 'SCIP' in the Notification Type column. The 'Submission Status' column for the last two rows is circled in red, showing 'ECHA Validation ...' and 'Report is ok'. The 'Submission Number' column for the last two rows is also circled in red, showing 'ATB070236-40' and 'ATB077769-12'.

Type	Notification Type	Company ID	Company Name	Name	Creation Status	Submission Status	Submission Number
	SSN	---	---	#MS DF Bushing	Successful	ECHA Validation ...	ATB070236-40
	SSN			#MS DF Bushing	Successful	Report is ok	ATB077769-12
	SCIP			#MS DF Bushing	Successful	Report is ok	ATB237761-20
	SSN			#MS DF Bushing	Successful	ECHA Validation ...	ATB091445-33

In QCM, two types of notifications exist: SCIP and SSN

The above example shows the bushing with the original Dossier (SCIP Type) and subsequent SSN
